The problem...

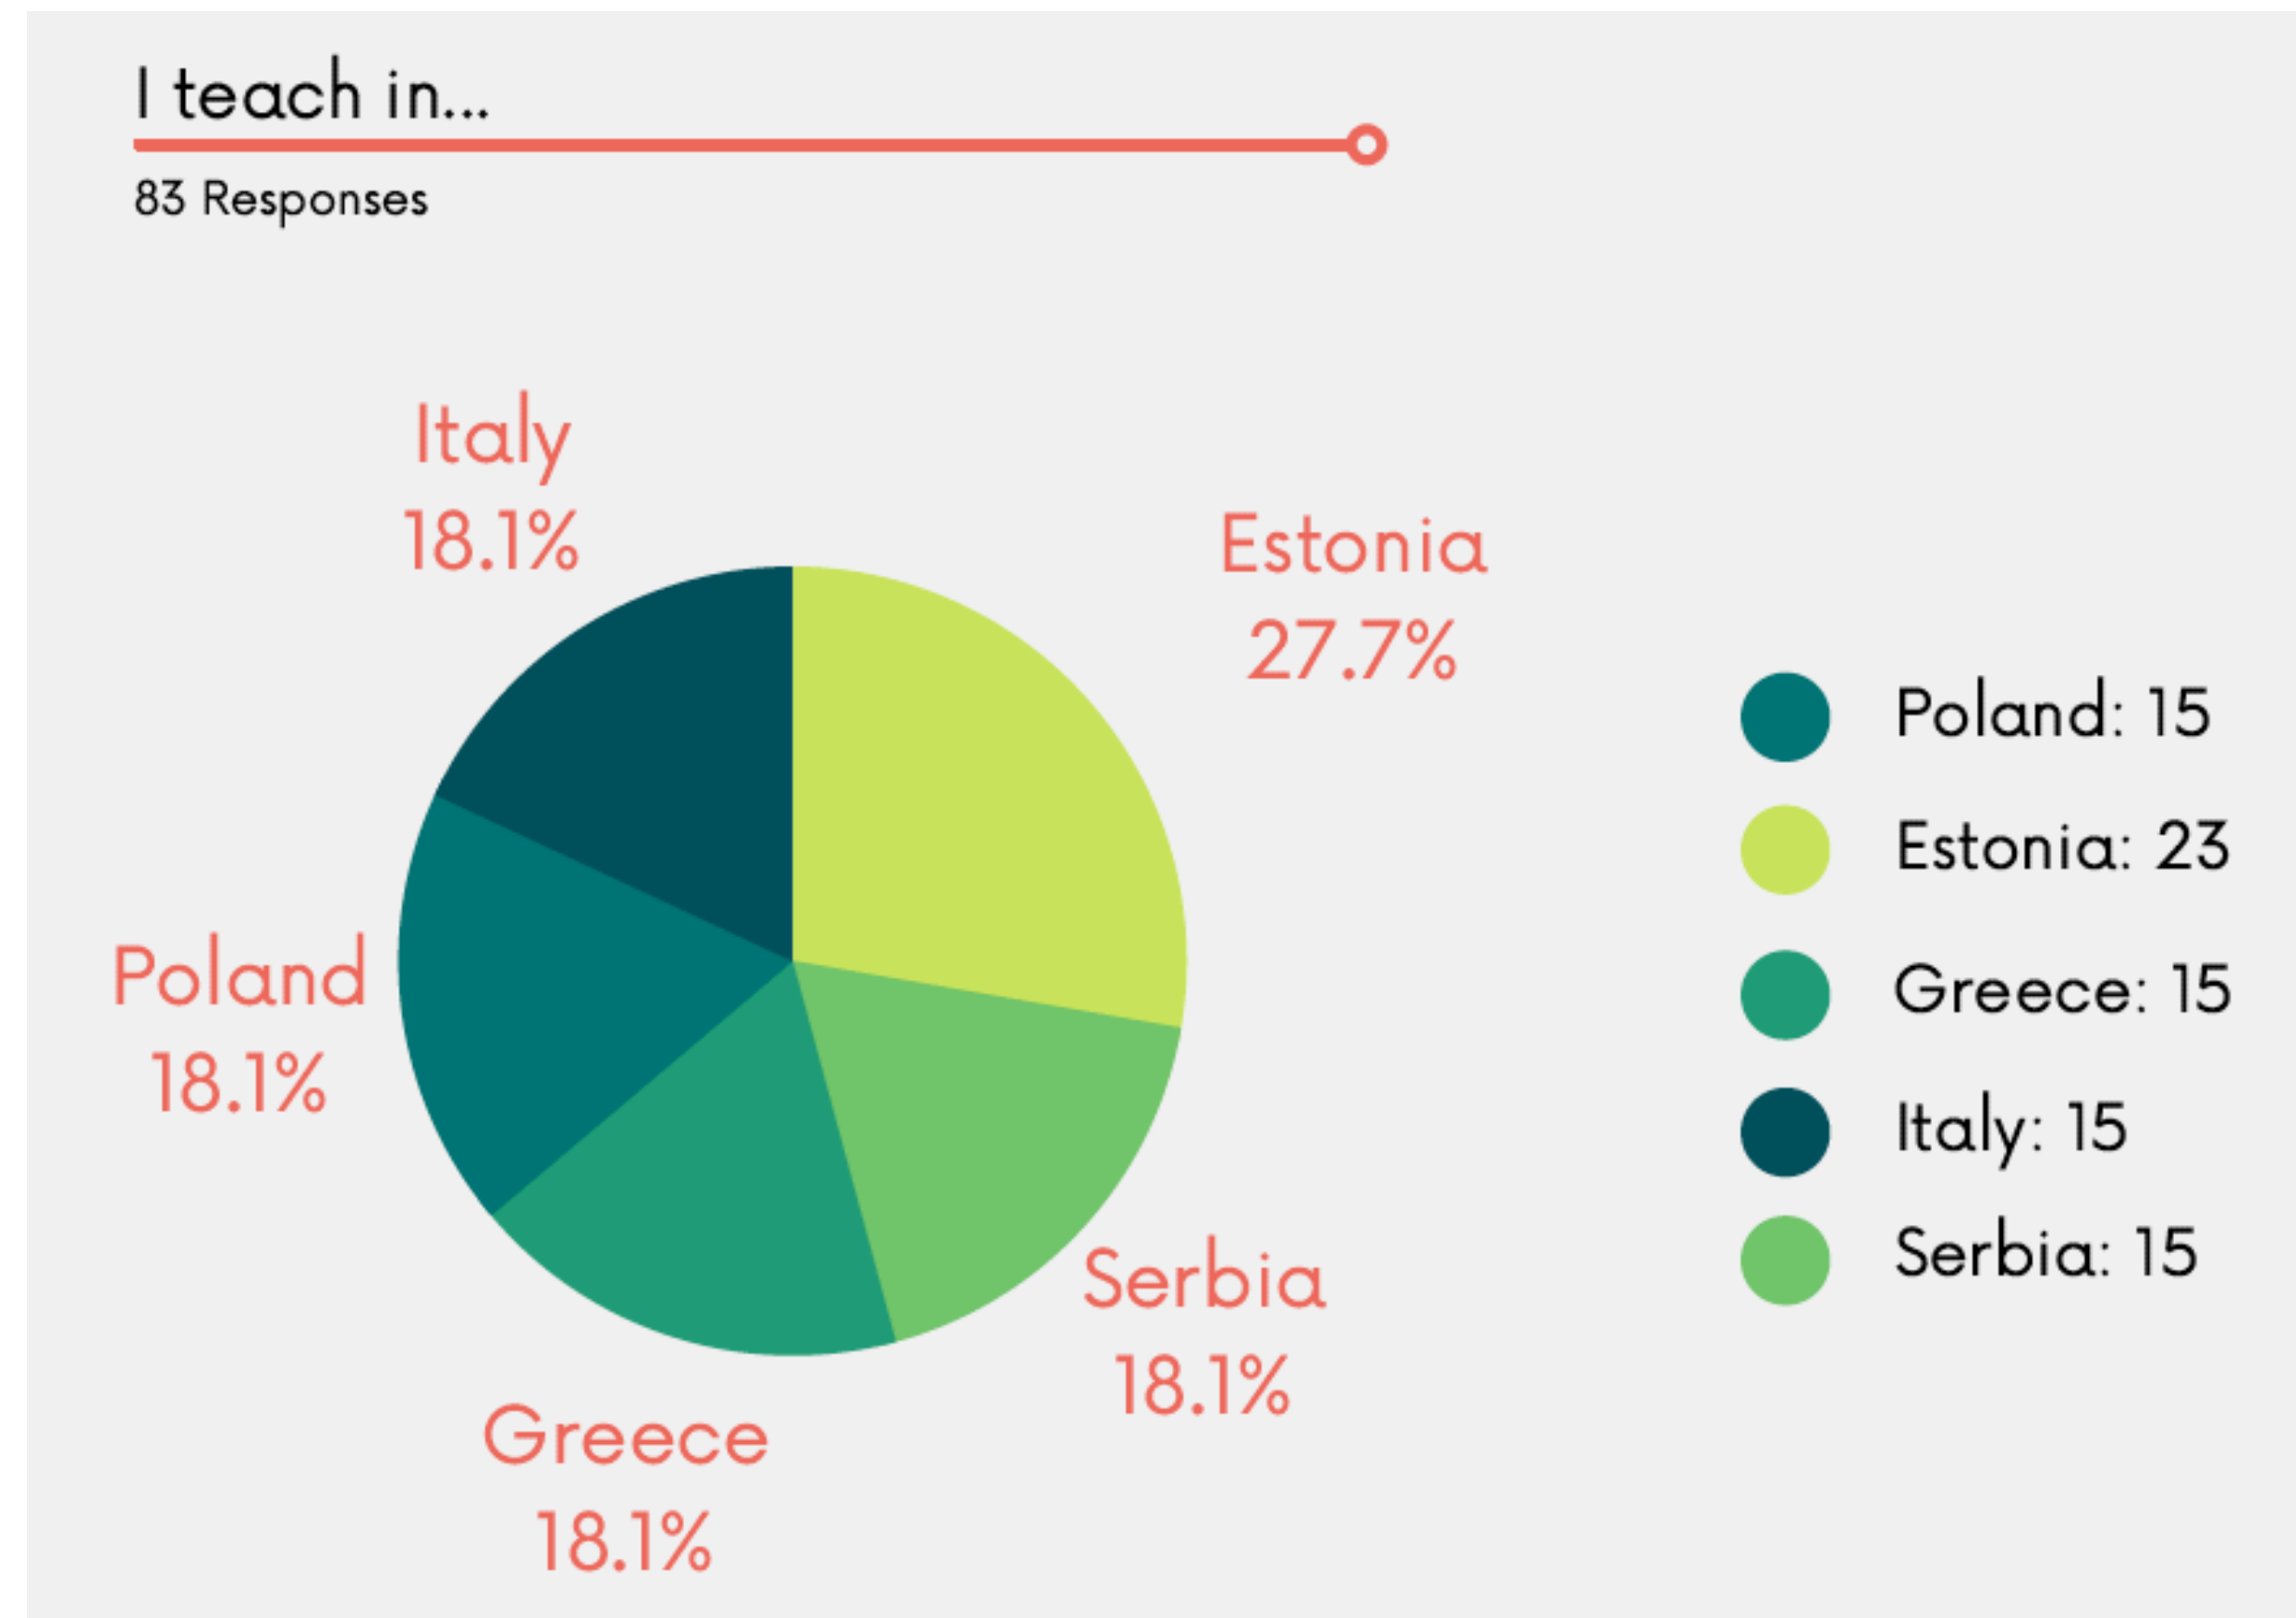

- Students...
 - use technology just for recreational purposes
 - are unaware of the ways technology can be used towards their educational excellence
 - are not that confident in using digital tools other than the ones on which they spend most of their time
 - lack creativity because of using the traditional education

Teachers' confidence in using digital tools

Would you like to have a short video instruction on how to use the digital solution to different methodologies?

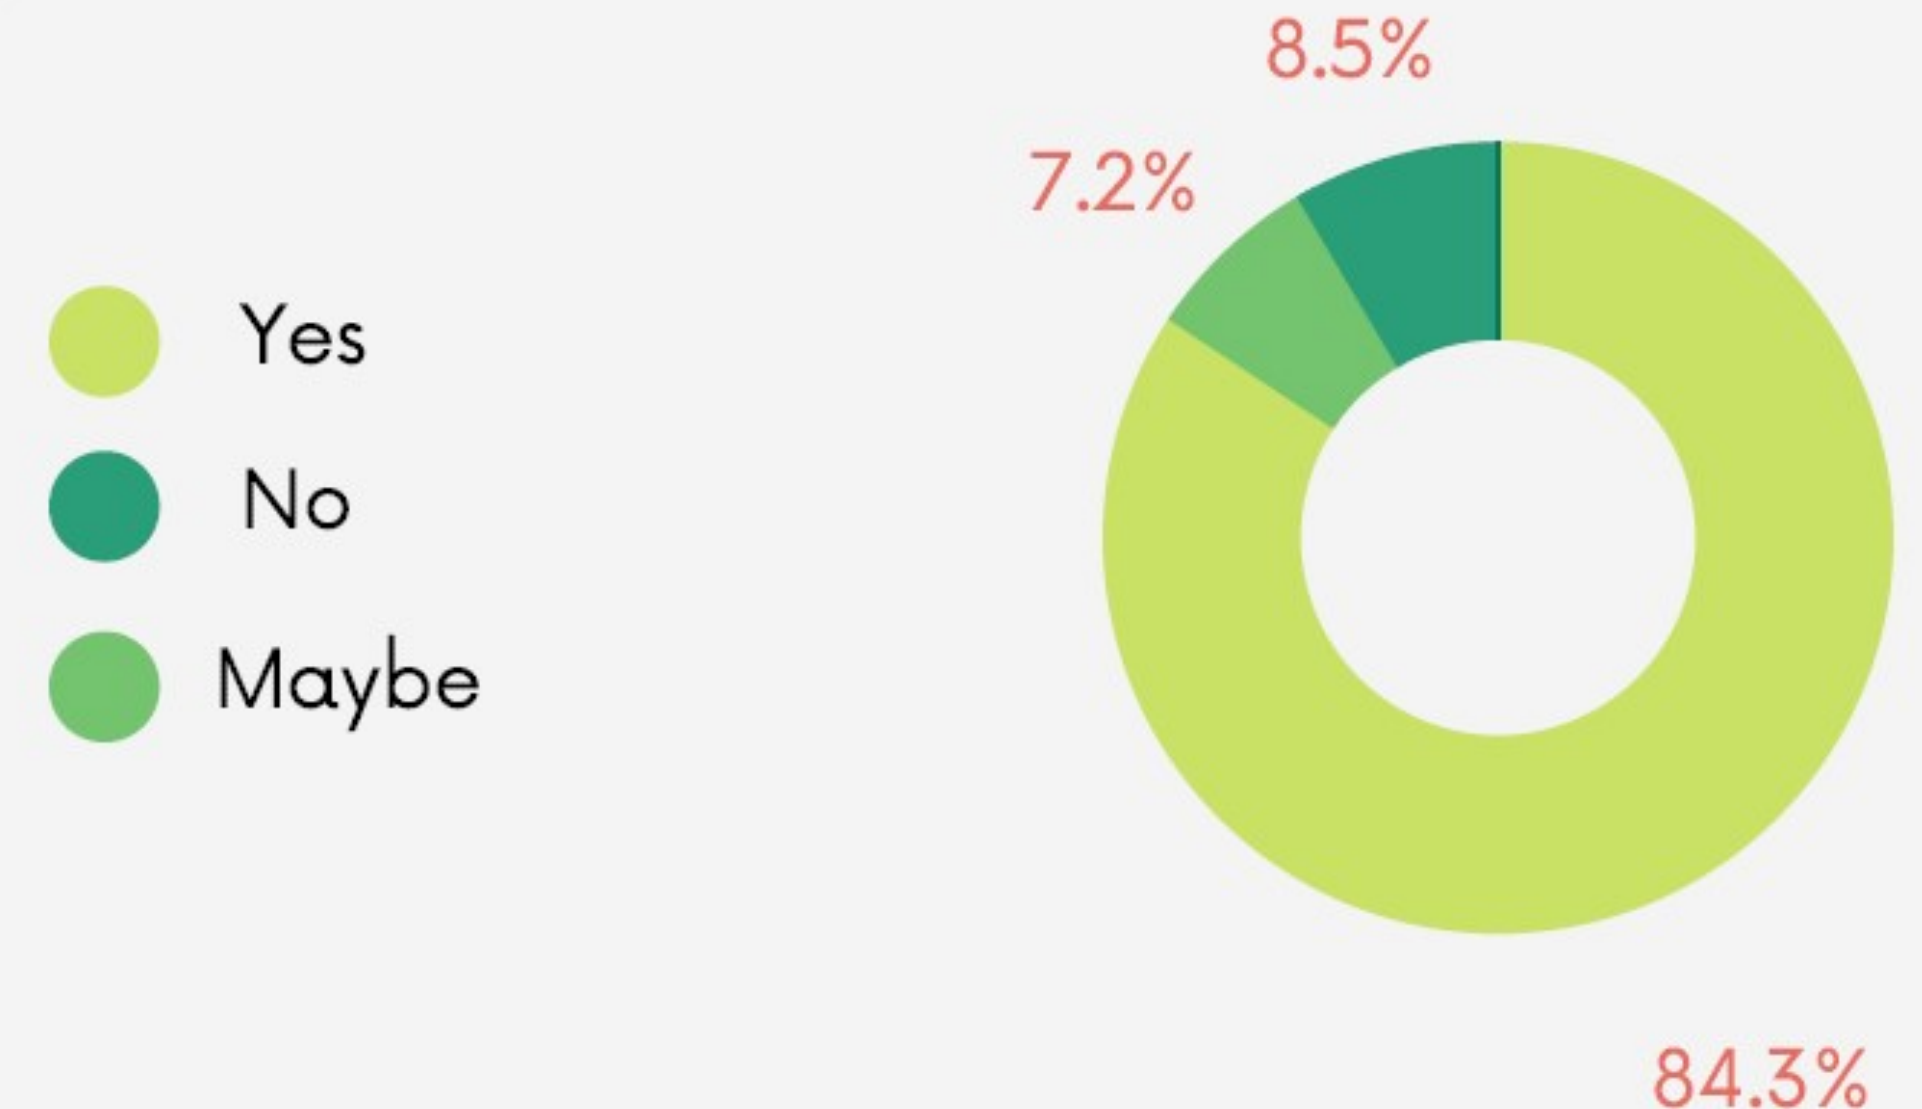

83 Responses

An even greater number of teachers would feel more confident if they had the opportunity to study examples before using the tool.

Would you like to see examples of how to use the tool in practice before you actually use it?
